EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose or reasonably suggest comparing an input word sequence with each of a plurality of reference word sequences, where the reference word sequences include phrase boundary information, and identifying one or more reference word sequences most closely matching the input word sequence for converting text to speech. It is generally known in the prior art to parse sentences to determine phrase boundaries, and to synthesize speech by inserting phrase boundary information into a phrase to be synthesized. *Hirschberg* represents the prior art, where a set of predetermined text is analyzed to generate intonational phrase boundaries as a statistical representation, but does not compare an input word sequence to each of a plurality of reference word sequences including phrase boundary information. Similarly, *Veilleux et al.* predicts phrase boundaries from text by comparing to a model.

Applicant's Specification, Page 2, Lines 15 to 17, states that predicting phrases by comparing to one or more closely matching reference word sequences gives sentences a more natural-sounding phrasing. The prior art of record does not disclose or reasonably suggest comparing to one or more closely matching reference word sequences having phrase boundary information so as to provide more natural-sounding phrasing.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
